greateoceanproperties

Elevate yourself.

The hilltop location of this 502sqm (app) vacant allotment provides two essential ingredients that will benefit any future dwelling, a good outlook and great proximity to the amenities of Aireys Inlet. Plans have been approved for a dwelling and the modern design sits well on the site. The benefit of this particular allotment is that it enjoys both front and side access which allows excellent flexibility with design options should you choose not to build the approved plans. Competitively priced for Aireys Inlet and vacant land in Aireys is getting more and more difficult to obtain. Even if you buy now and build sometime in the future at least you have reserved your place in this tightly held township.
